HOLIDAY AT NEW HAVEN

All projected energy costs and savings shown for all proposed residential plans are provided as estimates only which have been calculated according to the guidelines and requirements of the California Energy Commission Home Energy Rating System Program by taking into account certain assumed standard specifications and features of the subject residence and average utility energy rates available at the time of calculation. All projected energy costs of a typical resale home are provided as estimates only and have been calculated by taking into account comparable specifications and features, such as square footage and appliances, of a home built in 1990 to then-current building standards using average utility energy rates available at the time of calculation. All projected costs and savings do not take into account any federal, state or local taxes, fees or other charges which may be imposed by any applicable governmental agency, regulatory body or utility provider. Actual energy costs and savings, if any, are subject to change over time and will be based on various factors such as energy usage, household size and layout, utility rates and any applicable taxes, fees or other charges. Brookfield Residential makes no representation, warranty or guarantee, express or implied, as to the accuracy or completeness of any information provided herein which is not intended to reflect as-built conditions. Brookfield Residential reserves the right to alter or revise any and all information provided herein from time to time without notice.
